Welcome to the Edible Schoolyard

The Edible Schoolyard (ESY), a program of the Chez Panisse Foundation, is a one-acre organic garden and kitchen classroom for urban public school students at Martin Luther King, Jr. Middle School in Berkeley, California. At ESY, students participate in all aspects of growing, harvesting, and preparing nutritious, seasonal produce.

Classroom teachers and Edible Schoolyard educators integrate food systems concepts into the core curriculum. Students' hands-on experience in the kitchen and garden fosters a deeper appreciation of how the natural world sustains us and promotes the environmental and social well-being of our school community.
